Three masses 10 kg, 20 kg and 15kg are attached at a point
.....

Question:

Three masses 10 kg, 20 kg and 15kg are attached at a point at radii of 20 cm, 25cm and 15 cm respectively. If the angle between successive masses is 60° and 90° . Determine analytically the balancing mass to be attached at radius of 30cm.
